

Pine Cone Squirrel

Materials

- pine cone
- 1-inch pom-pom and 5mm pom-pom
- bumpy pipe cleaner and regular pipe cleaner
- wooden bead
- glue (craft glue, hot glue gun, or glue stick would all work)
- scissors or wire cutters

Directions

- 1) Glue the 1-inch pom-pom on the pointy end of the pine cone
- 2) Use the glue to attach wiggle eyes and the 5mm pom-pom (nose) onto the head (1-inch pom-pom)
- 3) Cut two pieces of 1-inch pipe cleaner and fold them in half to form a 'V' shape
- 4) Glue each inverted 'V' onto the top of the squirrel's head for ears
- 5) For the tail, cut off 2 bumps from the bumpy pipe cleaners and fold them in half and twist them together
- 6) Glue the twisted end of the bumps to the back of the pine cone (bend the top of the tail down to give it shape)
- 7) For the squirrels feet, cut two pieces of 2-inch pipe cleaner and fold each piece in half and glue to the bottom, front of pine cone
- 8) For the squirrel's arms, cut two more pieces of 2-inch long pipe cleaner and glue one to each side of the pine cone body
- 9) Glue a small piece of pipe cleaner on top of a wooden bead and glue to squirrel's hands to look like an acorn
