

## Spider Wreath

### Materials

- ring of cardboard
- black construction paper
- scissors
- glue
- small piece of yarn

### Directions

- 1) Trace a large plate on the cardboard
- 2) Trace a small plate in the center of the circle you just traced on the cardboard
- 3) Cut a small strip of cardboard and glue it onto the back of the cardboard over any folds. This will help reinforce the cardboard.\*
- 4) Cut strips of construction paper (about 1 ½ inches by 4 inches) \*
- 5) Glue the strips into rolls (like making a paper chain)
- 6) Glue the rolls onto the cardboard wreath
- 7) Fold a piece of construction paper in half and draw half of a spider (folding the paper will make the spider symmetrical). Use a white crayon to draw the spider's face.
- 8) Cut a small piece of yarn and tape one side to the spider and one side to the wreath so the spider hangs in the center of the wreath\*

\*Adults should help young children with these steps
